IN THE CLAIMS

5. Claim 52 (Currently amended). A method of controlling access to a secure facility comprising:
 - (a) providing at an entrance to a facility a camera, a user interface, and a printer;
 - (b) prompting a visitor to the facility to input his name to the user interface;

 - (d) printing via the printer an identification card for the visitor, the identification card including at least the visitor's name and photograph;

(e) allowing the visitor to access ~~the facility~~ a controlled geographical area within a building using the identification card; and

(f) providing a person at a location remote from the facility entrance, the remote person performing step (e) based upon successful completion of steps (c) and (d).

6. Claims 54-57 and 60 have been cancelled.

Allowable Subject Matter

7. Claims 1-9, 11-25, 28-34, 52, and 137-138 are allowed.

8. The following is an examiner's statement of reasons for allowance: The prior art of record taken alone or in combination with any other references, fails to specifically teach means of updating an identification card preview upon entry of each letter of the visitor's name is important because it allows the visitor to preview his identification card, of using an email address so that a visitor upon a second visit to a facility only needs to enter an email address in order to have a badge printed, use of an electronic messaging and calendaring system to populate in part an identification badge, sending electronically a list of persons present within a facility to an emergency governmental entity and wherein a remote attendant allows a visitor, after a self-generated badge and upon presentation/reading of the badge/pass, to access a controlled geographical area within a building. These limitations in conjunction with other limitations in the claimed invention were not shown by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
